Mr. Nicosia is a successful entrepreneur in many industries. Over 30 years of investment, market research, and technical analysis experience.

STRATEGIES	EMERGING OPPORTUNITIES	LOW CARBON PLUS
Description	The Emerging Opportunities strategy invests in leveraged and non-leveraged instruments traded on U.S. exchanges. This strategy seeks to invest in developmental and emerging technologies, products and services poised to benefit from the Seminole shift to technology driven economies. The strategy focus will include both finished and emerging technologies, products, services and strategies that are already in, or poised to enter, the revenue stage. Specifically, those that have the potential to disrupt the future landscape and create significant upside opportunities. This strategy may utilize leveraged investments, including, but not limited to, options, leveraged ETFs, and other derivative investments to enhance returns. Additional volatility may create additional downside risk.	The Low Carbon Plus strategy invests in leveraged and non-leveraged instruments traded on major global stock exchanges. This strategy may utilize leveraged investments, including, but not limited to, options, leveraged ETFs, and other derivative investments to enhance returns. Additional volatility may create additional downside risk. This Low Carbon Plus strategy focuses on clean energy investment opportunities including but not limited to, alternative energy, clean transportation, renewable natural gas, hydrogen production, carbon capture, storage and utilization, gas-to-solid carbon conversion, decarbonization, high-value carbon production. Investment could include opportunities within the whole renewable and clean energy eco-system.
